

Patrick C. Hsieh, MD

Edwin M. Todd/Trent H. Wells, Jr. Professor of Neurosurgery

Professor of Neurological Surgery and Orthopaedic Surgery

Keck School of Medicine

Director, Minimally Invasive Spine Program

Keck Medicine of USC

Los Angeles, California, USA

Patrick C. Hsieh, MD is a board-certified neurosurgeon in the United States that specializes in minimally invasive spine surgery, complex spine surgery, and spine tumor surgery. He is also a distinguished research scholar, having performed research in the field of neurogenetics and neurosciences at the National Institutes of Health and the Howard Hughes Medical Institute. He has done further research in the area of spinal cord injury, chordoma, minimally invasive spine procedures, and clinical outcomes research on a variety of spine treatments. Dr. Hsieh completed his medical education and training at University of Southern California, Northwestern University and Johns Hopkins University School of Medicine. Beyond his neurosurgery residency, he is triple fellowship trained in the areas of minimally invasive surgery, complex reconstructive spinal surgery, and spine oncology. Since his arrival at USC in 2008, he has led the efforts to establish the multidisciplinary comprehensive USC Spine Center, and he has ascended the academic ranks from Assistant Professor to Professor. He is also the recipient of the distinguished Edwin M. Todd/Trent H. Wells, Jr. Endowed Professor of Neurosurgery. He was elected to the board of directors at NASS in 2018 and is the director for the NASS International Council. Dr. Hsieh is well-recognized for his expertise in minimally invasive spine surgery, spinal deformity and spine tumor surgery. He has published extensively on those topics with over 70 peer-reviewed publications, and he has traveled nationally and internationally to speak at major spine societies and conferences to present his current research and share his knowledge and experience with other spine surgeons.
